eHealth Kerala Project - Replies to Queries No:3

SECTION REFERENCE IN THE EOI	Query	Reply to the Query
Section Disclaimer (Page 3): This is an independent process and has no impact on the subsequent RFP process. The sole objective of this document is to solicit Expression of Interest (EOI) from eligible entities. A separate Request for Proposal (RFP) would be issued post the EOI for state wide implementation of e-Health project in all the related healthcare institutions in phased manner under DHFW, GOVT. OF KERALA in the Modern Medicine system.	We assume this EOI is the predecessor of a limited RFP process, and that the RFP will only be issued to those companies who are prequalified vide this Expression of Interest (EOI) process.	RFP will be open to anybody who satisfy the pre-qualification criteria. EoI is mainly intended for providing an opportunity for leading firms in the sector to interact with the Project Management Unit and share information on the project. This will provide the firms sufficient input to prepare for RFP submission later.
Section Disclaimer (Page 3): Relevant technical and solution information to be reflected in detailed scope of work, solution architecture, technical specifications, Bill of materials, etc. shall be provided in the RFP. & Section 4. Instruction to Participants (Point No 10, line item 3, Page 15).Proposal should contain a omprehensive solution document consisting of the Technical Architecture, solution for handling the offline connectivity scenario, data handling capabilities/data sizing.	We understand that the actual System Requirement Specifications (Software Requirements Specification) will be a part of the RFP, The Technical Architecture, solution for handling the offline connectivity , data handling and data sizing sought for in the response – we assume is just indicative, and is only to gauge the understanding of the respondent.	Actual System Requirement Specifications (Software Requirements Specification) will be a part of the RFP. The Technical Architecture, solution for handling the offline connectivity , data handling and data sizing sought for in the response – are indicative, and is meant only to gauge the understanding of the Respondent.
Page 11, 2.4.1 – Building up of the Citizens Health Database. The base data comprising of the basic demographic details shall be provided by the department based on the SRDH (State Resident Data Hub), SECC (Socio Economic & Caste Census) data. This shall be verified & suitably updated by the field level health worker using hand held devices to make comprehensive root level demographic and public health data related to the entire household, mother and child health, ante natal care, family planning, communicable/ Non Communicable diseases etc.	We are assuming that the State health Information System will be integrated to SRDH for demographic verification, Would strongly recommend an online verification of the Citizen Identity online with CIDR (Central repository of the UIDAI), and use the verified and authenticated data for the State Health information System.	The proposed eHealth system shall be designed to carry out an online verification of the Citizen Identity with Central repository of the UIDAI.
